

**SECTION 1: Identification of the substance/mixture and of the company/undertaking****1.1. Product identifier**

Product form : Mixture  
Product name : EUTRA GRAISSE A TRAIRE TETINA  
Product code : EUTRA GRAISSE A TRAIRE TETINA  
Product group : Trade product  
Reference number : EUTRA GRAISSE A TRAIRE TETINA

**1.2. Relevant identified uses of the substance or mixture and uses advised against****Relevant identified uses**

Use of the substance/mixture : Agricultural

**Uses advised against**

No additional information available

**1.3. Details of the supplier of the safety data sheet**

INTERLAC France  
8, rue de la Kaltau  
67150 Hindisheim - FRANCE  
T 03.88.59.00.25  
[interlac.fr@wanadoo.fr](mailto:interlac.fr@wanadoo.fr)

**1.4. Emergency telephone number**

Emergency number : The emergency telephone number for France is the ORFILA (INRS) number: + 33 (0) 1 45 42 59 59. This number gives details of all the poison control centres in France. These poison control and toxicovigilance centres provide free medical care 24/7 (excluding the cost of the call). For the emergency telephone number for your own country, please contact the relevant local authorities and visit the ECHA (European Chemicals Agency) website: <https://echa.europa.eu>

**SECTION 2: Hazards identification****2.1. Classification of the substance or mixture****Classification according to Regulation (EC) No. 1272/2008 [CLP]**

Not classified

**Adverse physicochemical, human health and environmental effects**

Other hazards which do not result in classification : In the event of contact with the eyes: irritation, in particular in the event of prolonged contact.

**2.2. Label elements****Labelling according to the Regulation (EC) No. 1272/2008 [CLP]**

No labelling applicable

**2.3. Other hazards**

Other hazards which do not result in classification : In the event of contact with the eyes: irritation, in particular in the event of prolonged contact.

# EUTRA GRAISSE A TRAIRE TETINA

## Safety Data Sheet

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878

The mixture does not contain substance(s) included in the list established in accordance with Article 59(1) of REACH for having endocrine disrupting properties, or is not identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at a concentration equal to or greater than 0,1 %

### SECTION 3: Composition/information on ingredients

#### 3.1. Substances

Not applicable

#### 3.2. Mixtures

Name	Product identifier	%	Classification according to Regulation (EC) No. 1272/2008 [CLP]
Paraffin wax substance with national workplace exposure limit(s) (FR, GB)	CAS-No.: 8002-74-2 EC-No.: 232-315-6	50 – 80	Not classified

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

First-aid measures general	: If you feel unwell, seek medical advice (show the label where possible). Never give anything by mouth to an unconscious person.
First-aid measures after inhalation	: Not applicable to the usual use of the mixture. Consult a doctor if respiratory symptoms appear or persist.
First-aid measures after skin contact	: No specific measures are necessary. Seek medical advice if an irritation appears. Wash contaminated clothing before reuse.
First-aid measures after eye contact	: Rinse carefully with plenty of water with the eyelids held wide open. If eye irritation persists: Get medical advice/attention.
First-aid measures after ingestion	: If the person is conscious, rinse mouth with water. Do not induce vomiting. Immediately call a POISON CENTER/doctor.

#### 4.2. Most important symptoms and effects, both acute and delayed

Symptoms/effects after eye contact	: In the event of contact with the eyes: irritation, in particular in the event of prolonged contact.
Chronic symptoms	: See Sub Heading 2.1/2.3.

#### 4.3. Indication of any immediate medical attention and special treatment needed

No information / data available.

### SECTION 5: Firefighting measures

#### 5.1. Extinguishing media

Suitable extinguishing media	: Chemical powder Dry powder Foam CO2 (carbon dioxide) extinguisher Sand.
Unsuitable extinguishing media	: Solid water jet. Do not use a heavy water stream.

# EUTRA GRAISSE A TRAIRE TETINA

## Safety Data Sheet

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878

### **5.2. Special hazards arising from the substance or mixture**

Hazardous decomposition products when fire : If exposed to high temperatures, the product may release hazardous decomposition products such as carbon monoxide and carbon dioxide. Including other unidentified organic or inorganic products. Their inhalation is very dangerous.

### **5.3. Advice for firefighters**

Firefighting instructions : Use water spray or fog for cooling exposed containers. Exercise caution when fighting any chemical fire. Prevent fire fighting water from entering the environment.

Protection when fire : Do not enter the danger zone without suitable chemical protection clothing and self-contained breathing apparatus. Do not enter fire area without proper protective equipment, including respiratory protection.

Other information : Packaging exposed to heat or open flames should be cooled with a fine water spray. Prevent fire-fighting water from entering drains.

## **SECTION 6: Accidental release measures**

### **6.1. Personal precautions, protective equipment and emergency procedures**

General measures : Remove ignition sources. Use special care to avoid static electric charges. No open flames. No smoking.

#### **6.1.1. For non-emergency personnel**

Protective equipment : Personal protection : see section 8.

Emergency procedures : Avoid contact with eyes. Move away or remove any source of ignition or sparks. Evacuate unnecessary personnel. No action should be taken that involves personal risk or without proper training. Evacuate the area. Prevent access by persons not required and not wearing protective clothing. Do not touch or walk through spilled material.

#### **6.1.2. For emergency responders**

Protective equipment : Personal protection : see section 8. Equip cleanup crew with proper protection.

Emergency procedures : Avoid contact with eyes. Avoid vapours inhalation. Move away or remove any source of ignition or sparks. Ventilate area.

### **6.2. Environmental precautions**

Avoid release into natural bodies of water, waste water or the soil. Contain the leak or spill from spreading if it can be done without any danger. Do not discharge to surface water or to sewers. Inform local authorities if significant leaks cannot be contained. Prevent entry to sewers and public waters. Notify authorities if liquid enters sewers or public waters. Avoid release to the environment.

### **6.3. Methods and material for containment and cleaning up**

For containment : Suitable advice concerning the containment of a spill; the following containment methods can be envisioned:

- To limit the production of dust or vapour: cover the product with absorbent granules (inert, non flammable and non combustible).

- In case of large spills: install a protective enclosure, cover the sewers.

Collect the absorbent/product mixture and put it in compatible packaging for subsequent disposal in accordance with the regulations in force.

In case of a large spill, inform the competent authorities if the situation cannot be rapidly and effectively controlled.

The absorbent/product mixture shall be handled with the same precautions as the product itself.

# EUTRA GRAISSE A TRAIRE TETINA

## Safety Data Sheet

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878

Methods for cleaning up : To clean: wash the contaminated area making sure not to contaminate the natural environment. During the cleaning operations, continue to abide by the handling precautions. Soak up spills with inert solids, such as clay or diatomaceous earth as soon as possible. Collect spillage. Store away from other materials.

### 6.4. Reference to other sections

For information on handling, see section 7. For information on personal protective equipment, see section 8. For information on disposal, see section 13. See Section 8. Exposure controls and personal protection.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

Precautions for safe handling : Avoid contact with eyes. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of vapour. No open flames. No smoking. Avoid breathing dust/fume/gas/mist/vapours/spray.

Hygiene measures : Use personal protective equipment (appropriate gloves, splash goggles, suitable work clothing) in accordance with industrial hygiene best practices (see section 8). Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse.

### 7.2. Conditions for safe storage, including any incompatibilities

Technical measures : Comply with applicable regulations. Proper grounding procedures to avoid static electricity should be followed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment.

Storage conditions : - Conditions for storing the product in safety: Store in its original packaging, closed and in a dry and well ventilated area. Avoid extreme temperatures (heat and cold).  
- For more details on storage conditions to ensure product quality: Refer to the data sheet. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep only in the original container in a cool, well ventilated place away from : Keep in fireproof place. Keep container tightly closed.

Incompatible products : Strong acids. Oxidising agent. Strong bases.

Incompatible materials : Sources of ignition. Direct sunlight. Heat sources.

Heat and ignition sources : Keep away from heat and ignition sources.

### 7.3. Specific end use(s)

No data / information available.

## SECTION 8: Exposure controls/personal protection

### 8.1. Control parameters

#### 8.1.1 National occupational exposure and biological limit values

Paraffin wax (8002-74-2)	
France - Occupational Exposure Limits	
Local name	Paraffine (cire de), fumée
VME (OEL TWA)	2 mg/m <sup>3</sup>
Remark	Valeurs recommandées/admises
Regulatory reference	Circulaire du Ministère du travail (réf.: INRS ED 984, 2016)
United Kingdom - Occupational Exposure Limits	
Local name	Paraffin wax
WEL TWA (OEL TWA) [1]	2 mg/m <sup>3</sup> fume

# EUTRA GRAISSE A TRAIRE TETINA

## Safety Data Sheet

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878

<b>Paraffin wax (8002-74-2)</b>	
WEL STEL (OEL STEL)	6 mg/m <sup>3</sup> fume
Regulatory reference	EH40/2005 (Fourth edition, 2020). HSE

### 8.1.2. Recommended monitoring procedures

No additional information available

### 8.1.3. Air contaminants formed

No additional information available

### 8.1.4. DNEL and PNEC

No additional information available

### 8.1.5. Control banding

No additional information available

## 8.2. Exposure controls

### 8.2.1. Appropriate engineering controls

#### Appropriate engineering controls:

Use only in well-ventilated areas.

### 8.2.2. Personal protection equipment

#### Personal protective equipment:

Exposure assessment: Exposures are dependent on the product being handled, the potential for chemical release, and any resulting airborne concentrations or dermal contact. Since product handling and release scenarios vary, and no two workplaces are exactly alike, it is recommended that the potential for exposure be assessed prior to the product's use or introduction. Exposure assessments should be performed by an occupational hygienist, industrial hygienist, or other qualified occupational or environmental health professional. An exposure assessment should be conducted to determine the efficacy of any ventilation and the need for additional PPE.

The PPE indicated below are recommendations for exposures. An exposure assessment will identify more applicable measures to be implemented. PPE is always the last resort to avoid exposure. In any case technical and organizational measures have to be explored and used prior to the selection of PPE. The PPE selection is for operators trained to work with chemicals according to good industrial hygiene and safety practice. Operators have to be trained on the use of PPE. Choose PPE based on a hazard assessment, taking into account to the concentration and amount of dangerous substances, and to the specific work-place conditions.

#### 8.2.2.1. Eye and face protection

<b>Eye protection:</b>
No specific measures.

#### 8.2.2.2. Skin protection

<b>Skin and body protection:</b>
Skin protection appropriate to the conditions of use should be provided

<b>Hand protection:</b>
Due to the many possible conditions of exposure, the user should consider the actual period of use of a chemical protection glove to be significantly shorter than the period prior to permeation. It is essential to comply with the manufacturer's instructions for use, in particular concerning minimum thickness and minimum period prior to permeation. This information in no way replaces the compliance tests conducted by the final user. The protection provided by the glove depends on the conditions in which the substance/mixture is used. At the very least use chemical-resistant, leak-proof gloves (in accordance with standard EN 374). The use of this product means that the type of material and thickness of the gloves as well as the time taken to break down the material used to make the gloves cannot be decided until an in-depth study of the workstation has taken place, leading to a clear definition of the conditions of use and the most accurate possible evaluation. The gloves should therefore be chosen with the advice of the personal protective equipment manufacturer. Suitable material: NBR (nitrile rubber), CR (polychloroprenes, chloroprene rubber), FKM (fluorinated rubber) EU identification number: 5-6, Category 2 (EN 388). Check protective gloves for holes, cuts or cracks before use. After glove use, apply cleaning and skin care products.

# EUTRA GRAISSE A TRAIRE TETINA

## Safety Data Sheet

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878

### 8.2.2.3. Respiratory protection

#### Respiratory protection:

In the event of insufficient ventilation, wear suitable respiratory equipment. Dust/aerosol filter, type P2 (in accordance with standard EN 143)

### 8.2.2.4. Thermal hazards

No additional information available

### 8.2.3. Environmental exposure controls

#### Environmental exposure controls:

Avoid release into natural bodies of water, waste water or the soil.

#### Consumer exposure controls:

Take off contaminated clothing and wash before reuse.

#### Other information:

Do not eat, drink or smoke in the workplace under any circumstances. Do not eat, drink or smoke during use.

## SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

Physical state	: Solid
Colour	: Colourless.
Appearance	: Grease.
Odour	: Odourless.
Odour threshold	: Not available
Melting point	: Not available
Freezing point	: Not available
Boiling point	: Not available
Flammability	: Not available
Explosive limits	: Not applicable
Lower explosion limit	: Not applicable
Upper explosion limit	: Not applicable
Flash point	: Not applicable
Auto-ignition temperature	: Not applicable
Decomposition temperature	: Not available
pH	: Not available
pH solution	: Not available
Viscosity, kinematic	: Not applicable
Solubility	: Not available
Partition coefficient n-octanol/water (Log Kow)	: Not available
Vapour pressure	: Not available
Vapour pressure at 50 °C	: Not available
Density	: Not available
Relative density	: Not available

# EUTRA GRAISSE A TRAIRE TETINA

## Safety Data Sheet

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878

Relative vapour density at 20 °C	: Not applicable
Particle size	: Not available
Particle size distribution	: Not available
Particle shape	: Not available
Particle aspect ratio	: Not available
Particle aggregation state	: Not available
Particle agglomeration state	: Not available
Particle specific surface area	: Not available
Particle dustiness	: Not available

### **9.2. Other information**

#### **9.2.1. Information with regard to physical hazard classes**

No additional information available

#### **9.2.2. Other safety characteristics**

No additional information available

## **SECTION 10: Stability and reactivity**

### **10.1. Reactivity**

Reactivity relating to the substances, containers and contaminants to which the substance or mixture may be exposed during their transport, storage and use : No data available.

### **10.2. Chemical stability**

The product is stable in normal conditions of use. Stability of the substance or mixture under normal and predictable storage and handling room conditions in terms of temperature and pressure : Chemically stable under standard room conditions (room temperature).

### **10.3. Possibility of hazardous reactions**

Reaction or polymerisation of the substance or mixture releasing excessive heat or pressure or generating other dangerous conditions : This product will not polymerise by releasing excessive heat or pressure or by generating other dangerous conditions. (See section 10.1 for reactivity which can generate risks by taking into account the substances, containers and contaminants to which the substance or mixture may be exposed during their transport, storage and use.). Not established.

### **10.4. Conditions to avoid**

Listing of conditions such as temperature, pressure, light, shocks, electrostatic discharges, vibrations or other physical stresses which may lead to a dangerous situation : According to our knowledge, temperature, pressure, light, shocks, etc. do not lead to a dangerous situation. Keep away from open flames, hot surfaces and ignition sources. Extremely high or low temperatures.

### **10.5. Incompatible materials**

Families of substances or mixtures, or specific substances, such as water, air, acids, bases, oxidising agents, with which the substance or mixture may react by generating a dangerous situation : Strong oxidising agents, strong acids and strong bases.

### **10.6. Hazardous decomposition products**

Known dangerous decomposition products and products which may be reasonably predictable as such following use, storage, pouring and heating : This product does not decompose under normal conditions. Decomposition products in case of fire : consult section 5.2.

## **SECTION 11: Toxicological information**

### **11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008**

<b>ACUTE TOXICITY (ORAL)</b>	: Not classified
<b>ACUTE TOXICITY (DERMAL)</b>	: Not classified
<b>ACUTE TOXICITY (INHALATION)</b>	: Not classified

## Safety Data Sheet

according to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2020/878

### **11.2. Information on other hazards**

#### **11.2.1. Endocrine disrupting properties**

No additional information available

#### **11.2.2 Other information**

No additional information available

## **SECTION 12: Ecological information**

### **12.1. Toxicity**

Ecology - general : No data available.

Hazardous to the aquatic environment, short-term (acute) : Not classified

Hazardous to the aquatic environment, long-term (chronic) : Not classified

Not rapidly degradable

### **12.2. Persistence and degradability**

No additional information available

### **12.3. Bioaccumulative potential**

No additional information available

### **12.4. Mobility in soil**

No additional information available

### **12.5. Results of PBT and vPvB assessment**

No additional information available

### **12.6. Endocrine disrupting properties**

No additional information available

### **12.7. Other adverse effects**

Additional information : Avoid release to the environment.

## **SECTION 13: Disposal considerations**

### **13.1. Waste treatment methods**

Regional legislation (waste) : Disposal must be done according to official regulations.

Waste treatment methods : Dispose of in accordance with the local/national safety regulations in force.

Additional information : It is recommended to avoid or reduce waste production as much as possible.

The disposal of this product, solutions and by-products shall comply with the legal requirements for environmental protection and waste disposal and the requirements of all local authorities at all times.

A licensed waste disposal contractor will be in charge of the disposal of surplus and non-recyclable products. Do not evacuate untreated waste into the sewers.

Only dispose of this product and its container by taking all standard precautions. Handle non-cleaned and non-rinsed containers with care. Empty containers or liners may retain product residues. Avoid dispersing spilled materials, as well as their leakage, and any contact with the soil, waterways, drains and sewers.

Ecology - waste materials : Avoid release to the environment.
