Recommendation for disposal

The correct waste code number has to be determined in accordance with the local waste disposer. For small quantities a disposal into drains is possible. The ingredients of the product and the calcium disulfamates [CAS 13770-92-8] produced during decalcification do not impair sewage treatment plants. The toxicity of sulfamic acid against microorganisms in sewage treatment plants / activated sludge (anaerobic), EC50 (24h), is above 10 g/l (1%) (IUCLID) and is therefore harmless.

Packing

Packing material: PET-Bottles
Waste code according to AVV: 15 01 02 Plastic packaging
