

VizLite® DT

DUAL TECHNOLOGY

LONG LASTING TECHNOLOGY

The technology lasts as long as the garment with accelerated testing showing the phosphorescent pigments work for 20 years.

WORKS AT MINUS 30 AND UNDERWATER

Works in cold weather and is visible underwater.

ENVIRONMENTALLY FRIENDLY

VizLite DT absorbs UV energy from the surrounding environment and does not use electricity.

QUICK CHARGE TIME

Charges in 5 mins in daylight and 10 mins under fluorescent light and glows for up to 8 hours.

FULLY LAUNDERABLE

Can be washed on the garment and has been independently tested to meet the requirements for domestic laundry.

UNBREAKABLE

Can not be broken as it has no moving parts. It is an intelligent system that has no on or off switch.

INDEPENDENT CERTIFICATION

Certified to meet global standards including ANSI 107, Hi Visibility, Oeko Tex and many more.

NO BATTERIES REQUIRED

Charges by exposure to UV light, either natural or artificial. It quickly reaches its full charge in 5-10 minutes.

AWARD WINNING INNOVATION

VizLite DT has won many design and safety innovation awards.

LIGHTWEIGHT

In comparison to other types of Lit systems, VizLite DT is a lightweight solution which adds less weight to a garment.

INCREASED SAFETY

VizLite DT protects people by increasing their visibility in low light and dark conditions.

MAINTENANCE FREE

No ongoing maintenance is required by the user as there are no electrical or mechanical parts.

UC-ME

COMFORT. SIMPLICITY. SUPERIOR VISIBILITY.
